

What is claimed is:

1. A telescopic attachable accessory container w/ bookmark for books for holding writing instruments in a container attached to a book. comprising:

means for keeping the lid shut.;

means for securing the elastic band to the outer most sleeve.;

means for keeping the container from over extending.;

means for securing the notch., securely set to said means for keeping the container from over extending.;

means for holding the container to the spine of the book., securely molded to said means for securing the elastic band to the outer most sleeve.;

means for the elastic band and bookmark to go through the lid and secure to the compartment.;

means for telescoping with outer most sleeve, externally constructed to said means for keeping the container from over extending.;

means for keeping the contents inside of the

container, pivotally fitted to said means for telescoping with outer most sleeve, structurally engraved to said means for the elastic band and bookmark to go through the lid and secure to the compartment., and adjustably molded to said means for keeping the lid shut.;

means for securing the elastic band and the bookmark to container., structurally framed to said means for telescoping with outer most sleeve, and replaceably bracketed to said means for holding the container to the spine of the book.;

means for marking the last page the reader completed., replaceably bracketed to said means for securing the elastic band and the bookmark to container.; and

means for telescoping with inner most sleeve, telescopically assembled to said means for telescoping with outer most sleeve, structurally engraved to said means for securing the notch., and removably attached to said means for securing the elastic band to the outer most sleeve.

2. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for keeping the lid shut. comprises a lid latch.

3. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for securing the elastic band to the outer most
sleeve. comprises a release anchor.

4. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for keeping the container from over extending.
comprises a notch.

5. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for securing the notch. comprises a groove.

6. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for holding the container to the spine of the book.
comprises an elastic band.

7. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for the elastic band and bookmark to go through the
lid and secure to the compartment. comprises an opening.

8. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for telescoping with outer most sleeve comprises an
inner most sleeve.

9. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for keeping the contents inside of the container

comprises a lid.

10. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for securing the elastic band and the bookmark to
container. comprises a compartment.

11. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for marking the last page the reader completed.
comprises a bookmark.

12. The telescopic attachable accessory container w/
bookmark for books in accordance with claim 1, wherein said
means for telescoping with inner most sleeve comprises an
outer most sleeve.

13. A telescopic attachable accessory container w/ bookmark

for books for holding writing instruments in a container attached to a book. comprising:

a lid latch, for keeping the lid shut.;

a release anchor, for securing the elastic band to the outer most sleeve.;

a notch, for keeping the container from over extending.;

a groove, for securing the notch., securely set to said notch;

an elastic band, for holding the container to the spine of the book., securely molded to said release anchor;

an opening, for the elastic band and bookmark to go through the lid and secure to the compartment.;

an inner most sleeve, for telescoping with outer most sleeve, externally constructed to said notch;

a lid, for keeping the contents inside of the container, pivotally fitted to said inner most sleeve, structurally engraved to said opening, and adjustably molded to said lid latch;

a compartment, for securing the elastic band and the bookmark to container., structurally framed to

said inner most sleeve, and replaceably bracketed to said elastic band;

a bookmark, for marking the last page the reader completed., replaceably bracketed to said compartment; and

an outer most sleeve, for telescoping with inner most sleeve, telescopically assembled to said inner most sleeve, structurally engraved to said groove, and removably attached to said release anchor.

14. A telescopic attachable accessory container w/ bookmark for books for holding writing instruments in a container attached to a book. comprising:

a lid latch, for keeping the lid shut.;

a release anchor, for securing the elastic band to the outer most sleeve.;

a notch, for keeping the container from over extending.;

a groove, for securing the notch., securely set to said notch;

an elastic band, for holding the container to

the spine of the book., securely molded to said
release anchor;

an opening, for the elastic band and bookmark to
go through the lid and secure to the compartment.;

an inner most sleeve, for telescoping with outer
most sleeve, externally constructed to said notch;

a lid, for keeping the contents inside of the
container, pivotally fitted to said inner most sleeve,
structurally engraved to said opening, and adjustably
molded to said lid latch;

a compartment, for securing the elastic band and
the bookmark to container., structurally framed to
said inner most sleeve, and replaceably bracketed to
said elastic band;

a bookmark, for marking the last page the reader
completed., replaceably bracketed to said compartment;
and

an outer most sleeve, for telescoping with inner
most sleeve, telescopically assembled to said inner
most sleeve, structurally engraved to said groove, and
removably attached to said release anchor.
